

December 2020

Dear Passport Customer,

We are truly excited about these NEW PUP benefits for you!

Our latest release is jam-packed with new enhancements that you will love! Here's just a few:

PBS Version 12.07 New Enhancements

AP – Paying vendors electronically via ACH is easier now as remittance advices may be emailed to your vendors.

Auto-emailing capabilities are now available in AP, AR, OE, POS and PO.

In Order Entry, a new item price lookup window compares the current price to what the customer was charged in the past, allowing a choice.

Purchase Order Automation – creating purchase orders during order entry is now possible for back-ordered or drop shipped items.

PDF Forms Designer - The new functionality of the PDF Forms Designer streamlines and simplifies custom forms printing. See the many advantages over the older printing methodology:

Year End Updates – available soon for W2 reporting changes as well as AP 1099-NEC forms.

Benefits of staying current:

- Enjoy the many feature and functionality enhancements to help you run your business smarter and better; staying competitive is key now.
- Maintain compatibility for Windows 10, Microsoft Server 2019, MS SQL, and AcuXDBC.
- Stay current on regulatory changes to Payroll and Accounts Payable.

Passport strongly recommends maintaining your Passport software products, as this protects the very valuable investment in your system and data housed over the past 10, 20, 30 or more years.

The Passport Update Program (PUP) maintenance, and applying updates, is affordable insurance to keep your system running accurately and reliably, every day, and into the future!

We invite you to talk to your Passport Partner.

We thank you for your business.

The Passport Team
